# Shrimpton's Hill HEREFORDS

SHORT GESTATION SPECIALISTS

**Shrimpton's Hill Herefords is proud to present this catalogue of 140 R2 Registered Hereford Short Gestation bulls for the 2023 sale, in conjunction with PGG Wrightson and Progressive Livestock**

Another year has raced by and while the weather has been quite kind in South Canterbury, the climate from Wellington has certainly been disturbing. It's a very uncertain time in all areas of agriculture, not helped by product prices and interest rates.

We welcome Progressive Livestock to join the selling team with PGG Wrightson at the sale this year. We appreciate their network in the dairy sector and their motto of being a "LegenDairy Team". Special thanks in particular to our agents, Cameron Gray, PGGW and Tim Bell, PLL for your input into our business.

This year's sale bulls have been run in 2 mobs and with the generally kind season, have come through the winter very well. While the phenotype of the group can vary with the seasons, the genotype continues to improve annually. Lot 76 is a great example of this, with his GL at -13.3 (2nd shortest GL bull ever in Australasia)-does it matter what he looks like, when he will give you a week of extra milk per cow mated?

After focusing on gestation length in our breeding program for many years, we are well and truly world leading in that trait. Given the recent dairy pay out news, we believe that those extra days in milk from shorter gestation bulls, are now more important than ever.

We are very conscious, that given the expected bobby calf requirements, the "beefy" calves need to not only come early, but also have improved growth and carcass quality.

Last year we purchased the highest IMF (marbling) Hereford bull in NZ and have calves by him due any day, along with calves by highly ranked Australian sires for this trait.

Lot 1, 2022, auctioned by Wayne #YOLOFarmerNZ, now President of NZ Fed Farmers, Langford, allowed us to again donate \$3400 to Meat the Need, The bull was purchased by our great clients Park Lane Dairy Ltd in Mid Canterbury.

We loved being included in Meat the Need's "Big Feed" telethon in December and were thrilled with its huge success and ever growing profile. Our support for Meat the Need continues this year, with the sale of Lot 1 2023, and all going well Wayne will squeeze us in his crazy schedule, to auction him.

Currently we have 30 bulls involved in the LIC semen market, either being collected for both the domestic and international market or being progeny tested for future use.

Shrimpton's Hill 17- 45 continues through LIC's progeny testing, to be the shortest gestation length Hereford ever used and currently is the shortest beef bull out of all 16 breeds in their semen catalogue. He has also ranked the shortest gestation bull in the Beef and Lamb Dairy Sire Trial, and on Breedplan at -14.1 for GL.

We continue to enjoy a wonderful relationship with LIC, and now deal with a specialised Beef Team, of Jen Campbell, Paul Charteris and Nicola Hemming. They are vital in giving us direction with our breeding decisions and growing our product.

The LIC Breeders' Day is an honour to attend, and to be recognised with fellow elite NZ Dairy seed stock producers.

Our Hereford Hut is proving a great attraction for anyone that visits. It's a stunning place to relax and enjoy the views, or hunt wallabies, fallow and pigs.

Hamish and Abby are taking bookings from October onwards and hope to grow this sideline.

Without a doubt the highlight of the last 12 months, has been the birth of Archie John McKerchar, to Hamish and Abby. Archie is the 5th generation of McKerchar to live at Shrimpton's Hill.

Our daughter Fiona, who is excelling in her IT role in London, made it home for a few weeks and Archie's arrival earlier in the year. While not living here, she is still a great sounding board for our business.

We wish you well with your purchases and thank you for showing interest in our genetics.

John and Liz McKerchar

## Explanation on EBV's (Estimated Breeding Values)

### Calving Ease Direct

Calving Ease (DIR) EBVs are estimates of genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers. The EBVs are reported as differences in the percentage of unassisted calvings.

Higher, more positive, Calving Ease (DIR) EBVs are more favourable. For example, a bull with an EBV of +5.0% would be expected, on average, to produce 3% fewer difficult calvings from 2 year old heifers than a bull with an EBV of -1.0% (6% difference between the sires, then halved as they only contribute half the genetics).

### Gestation Length

Gestation Length EBVs are estimates of genetic differences between animals in the number of days from the date of conception to the calf birth date. Gestation Length EBVs are expressed in days and are calculated from the joining date and birth date records for calves conceived by either AI or Hand Mating.

Shorter gestation length is generally associated with lighter birth weight, improved calving ease and improved re-breeding performance among dams. In addition, calves born with a shorter gestation length are often heavier at weaning due to more days of growth. Consequently, lower or more negative Gestation Length EBVs are considered to be more favourable. For example, a bull with a Gestation Length EBV of -2 days would be expected to produce calves that are born earlier, and more easily, than a bull with a Gestation Length EBV of +2 days.

### Birth Weight

Birth Weight EBVs are estimates of genetic differences between animals in calf birth weight. Calf birth weight is the biggest genetic contributing factor causing calving difficulty in heifers.

Birth Weight EBVs are expressed in kilograms (kgs) and are calculated based on weights of calves taken at birth. Small, or moderate, Birth Weight EBVs are more favourable. For example, a bull with a Birth Weight EBV of +2 kg would be expected to produce lighter calves at birth than a bull with a Birth Weight EBV of +6 kg, with a lower risk of a difficult birth.

Please note, whilst low Birth Weight EBVs are favoured for calving ease they are also generally associated with lower overall growth potential. Consequently, birth weight and growth need to be carefully balanced. Fortunately, animals can be found that have both moderate Birth Weight EBVs and above average EBVs for later growth.

### 200 Day Growth

200 Day Growth EBV's are estimates of the genetic differences between animals in live weights at 200 days of age due to their genetics for growth, 200 Day Growth EBV's are expressed in kilograms (kg) and are calculated from the weights of calves taken between 80 and 300 days of age.

This EBV is a measure of an animal's early growth to weaning. It is an important trait for breeders naming off animals as vealers or weaners. Larger more positive, 200 Day Growth EBV's are generally more favourable. For example, a bull with a 200 Day growth EBV of +30kg would be expected to pedigree heavier calves at 200 days of age (or weaning) compared to a bull with a 200 Day Growth EBV of +10kg.

# WE'VE MADE BULLS MORE ATTRACTIVE.

**14 days  
FREE  
cover**

**6.5%  
for 12  
months**

The handsome beasts in this catalogue will look even more appealing on sale day, thanks to FMG – the country's leading rural insurer. With 14 days free Exclusive Bull Cover, they'll be automatically insured from the fall of the hammer, covering their transit and infertility. And you can keep that cover going for the remaining 12 months for just 6.5% of the purchase price, for bulls up to the value of \$50,000. So don't miss this chance to buy bulls covered by FMG. It's a mighty attractive offer.

Please note this is only a summary of FMG products and services and is subject to our specific product documentation. For full details, refer to the relevant policy wordings at [fmg.co.nz](http://fmg.co.nz)

*We're here for the good of the country.*

## Conditions of Sale

**All lots will be sold subject to the usual conditions governing auction sales under the auspices of the New Zealand Stock and Station Agents Association. Such conditions will be posted up at the sale.**

The New Zealand Stock & Station Agent's Association Conditions of Sale and, to the extent deemed relevant by the selling companies, PGW Wrightson Limited (PGW) and Progressive Livestock Ltd (PLL)

The selling companies' Terms of Sale apply to this sale. When proceeds are credited or a purchase is debited to a PGW or PLL monthly credit account, then PGW and PLL's Monthly Account Terms of Trade (as amended from time to time) apply to the extent deemed relevant by PGW and PLL. These terms can be inspected at the registration desk and on the wall in the auction room. The current versions of PGW's Terms of Sale and Monthly Account Terms of Trade are also available online at: [www.pgwrightson.co.nz/Our-Company/Terms-and-Conditions](http://www.pgwrightson.co.nz/Our-Company/Terms-and-Conditions) or in hardcopy on request.

### REBATE

All intending purchasers must register at the sales office prior to the sale.

The selling companies' will pay a purchasing rebate of 6% of the purchase price excluding GST, plus GST, to livestock companies & recognised independent livestock agents with a PGW or PLL account who have introduced buyers to PGW and PLL before the sale and/or accompanied buyers to the sale.

## Intellectual Property

With respect to our contractual agreement with LIC, Clause 62a applies

62A. The Client acknowledges that the SGL Product embodies valuable LIC intellectual property rights, and is sold solely for the purpose of facilitating SGL pregnancies and SGL Offspring must not be bred. To that end, the Client must not, except with LIC's prior written permission, directly or indirectly:

- . (a) advertise for sale or supply, or sell or otherwise supply, or collect, deal in or use in any way for any purpose, any semen, embryo or other form of germplasm (SGL Germplasm) from any SGL Offspring; or
- . (b) use the SGL Offspring or allow the SGL Offspring to be used in circumstances where the SGL Offspring are used or may be used for the collection of SGL Germplasm; or
- . (c) use the SGL Offspring or allow the SGL Offspring to be used where the SGL Offspring, or the SGL Germplasm of the SGL Offspring, is mated with any other animal using any form of breeding or reproductive technology, including (without limitation) artificial insemination, embryo transfer or natural mating; or
- . d) provide access to or possession of or dispose of the SGL Offspring (whether born or unborn) to any person (other than a director or an officer, employee or agent of the Client, acting in that capacity) (SGL Transferee) in circumstances where the SGL Offspring will or may be used for mating or the collection of SGL Germplasm without first entering into a written agreement with the SGL Transferee in the form set out in Schedule 2 to these Service Rules. The Client must send the original agreement to LIC within 14 days of entering into it.
- . The Client acknowledges that this restraint applies irrespective of the means by which the Client came into possession or control of any SGL Offspring and/or any SGL Germplasm and is reasonably required to protect the value and viability of the LIC artificial breeding and genetics programme, which represents a substantial and long term investment in capital, research and development, and which is of strategic importance to the New Zealand dairy industry.

## Premier Bull Cover

### ***What is Premier Bull cover?***

All bulls auctioned at this sale up to the value of \$25,000 will automatically be covered under FMG's Premier Bull cover for 14 days at no cost to the purchaser.

### ***Length of cover***

To extend cover for the specified bull beyond 14 days you need to tick Premier Bull cover 12 months on the Purchaser Instruction and Insurance Slip in this catalogue. The specified bull is then covered for the remaining period of 12 months. The premium is payable to FMG and is in addition to the purchase price of the bull.

If you require an alternative cover period talk to an FMG representative.

### ***Your bull's value***

Any bull covered under this policy must be purchased for \$25,000 or less.

For any bull purchased over \$25,000 talk to an FMG representative.

### ***During the period of insurance, the specified animal is covered for:***

- Death or infertility as a result of accident, disease or illness.
- Transit.
- Theft.

### ***What we will pay***

Fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

### ***Disclaimer***

Please note this is only a summary of the product and is subject to our specific product documentation. For full details, you should refer to the policy document. You can get these documents, and any other information you need, from your FMG representative, by calling us or visiting our website.
